KINGDOM[®]
— FLOORING —

OUR RANGE

REAL WOOD FLOORS

Up Beat: Our contemporary European-styled real wood floors are offered to you in a standard thickness of 14.5mm, with finishes available in smoked, satin, matt and brushed. Our Up Beat collection is a multi-layered product with a core of 100% birch plywood.

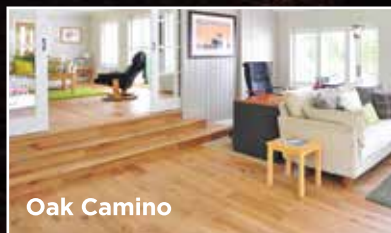

Flair: The Flair collection comes to you in a thickness of 14.5mm and is offered in some sublime shades that will surely add value to your residential or commercial space.

Mingle: Our Mingle collection is inspired combined forces that come together to form something trippy. Presented to you with a thickness of 14.5mm and the tongue and groove system, this collection is sure to revolutionise your home

Herringbone: The planks in this range mingle at 90 degrees, giving them a peculiar criss-cross effect that adds to its beauty. The patterns eventually form L's, hence the name.

Chevron: This range is a result of wood planks meeting at points, thus creating a continuous zig-zag or criss-cross pattern. In this particular range, the planks meet at a 45-degree angle which creates diagonals. It is a classic design which is now very much in vogue.

Throwback: True to its name, this collection takes you back in time. The textured surface of these planks ensure that any superficial scratch is disguised from the floor's original surface.

Oak Camino

TODO® CLICK TILES

Wood Series: The wood series are offered in various shades which make it impossible for the naked eye to differentiate between a Real wood floor and a **TODD® click tile**. The wood series is offered in 18 shades with the option of a EIR press. The advantage of the EIR effect is that it gives a wood finish and the grains of the wood can be seen clearly and adds a beautiful texture to the floor. It comes with the Intelli-click® system offered by us and an option of IXPE of 0.5mm which will be a support for your tile. The total thickness offered here is 5mm.

Stone Series: The stone series has a range of different colors from sea mist to white marble you can choose any. Like the wood series it is offered in a thickness of 5mm and an IXPE to bolster the performance. This series also comes with our Intelli-click® system and is offered to you in a size of 305*610. The reason to have this size is to give an effect of a tile rather than a plank unlike the wood series. This collection is all about natural stone to bring out the real stone effect and feel.

White Marble

REASONS TO BE FLOORED BY KINGDOM

After discovering what Kingdom Flooring is made of, you might just put your foot down and insist on it. So let's get into details.

Design:

With a wide range of premium designs to choose from, there's a lot to trip on.

Quality:

We conduct several quality checks before putting our stash out there, so there is no room for any errors.

Expertise:

As mentioned before, we've been tripping on wood for over 100 years.

Preferences:

We offer complete flooring solutions, so you can be assured your preferences will be taken into account.

Innovation:

We were the first company to introduce Intelli-click® in multi-layered 100% birch real wood floors as well as new generation Do-It-Yourself TODD® click tiles.

Presence:

Besides possessing a pan-India dealer network we also offer unmatched pre and after sales service.
